# Megawatt

Nick Montfort

A novel  
computationally, deterministically generated  
extending passages from Samuel Beckett's *Watt*

Bad Quarto / Cambridge, Massachusetts

# Preface

*Megawatt* is the title of both a computer program, the source code to which you may be reading, and the output of this program, which in many ways is like a standard novel and which you may instead be reading. This note appears at the beginning of both.

The program *Megawatt* is based on passages from Samuel Beckett's novel *Watt*, first published in 1953 but written much earlier, when Beckett was aiding the French Resistance during World War II.

The novel *Megawatt* leaves aside all of the more intelligible language of Beckett's novel and is based, instead, on that which is most systematic and inscrutable. It does not just recreate these passages, although with minor changes the *Megawatt* code can be used to do so. In the new novel, rather, they are intensified by generating, using the same methods that Beckett used, significantly more text than is found in the already excessive *Watt*.

To produce the novel in markdown format, run `megawatt.py` (a Python 2 program) with `TextBlob` (a text processing library) installed.

```
% python megawatt.py > megawatt.text
```

To produce PDF and epub documents, use `pandoc`:

```
% pandoc -V geometry:paperwidth=5.5in \  
  -V geometry:paperheight=8.25in \  
  -V geometry:margin=.7in -o megawatt.pdf \  
  megawatt.text  
% echo '% Megawatt' > info.txt  
% echo '% Nick Montfort' >> info.txt  
% pandoc -o megawatt.epub info.txt megawatt.text
```

*Megawatt* was written/generated for the second NaNoGenMo (National Novel Generation Month) in November 2014, and is free software.

And sometimes Watt understood all, and sometimes he understood most, and sometimes he understood much, and sometimes he understood half, and sometimes he understood little, and sometimes he understood less, and sometimes he understood bits, and sometimes he understood nothing, as now.

Sometimes he emptied the bowl, scraping its sides, and the bottom, with the trowel, until they shone, and sometimes he left one twentieth of it, or two twentieths of it, or three twentieths of it, or four twentieths of it, or five twentieths of it, or six twentieths of it, or seven twentieths of it, or eight twentieths of it, or nine twentieths of it, or ten twentieths of it, or eleven twentieths of it, or twelve twentieths of it, or thirteen twentieths of it, or fourteen twentieths of it, or fifteen twentieths of it, or sixteen twentieths of it, or seventeen twentieths of it, or eighteen twentieths of it, or nineteen twentieths of it, or some other fraction, and sometimes he left the whole of it.

""\_Megawatt\_ is the title of both a computer program, the source code to which you may be reading, and the output of this program, which in many ways is like a standard novel and which you may instead be reading. This note appears at the beginning of both.

The program `_Megawatt_` is based on passages from Samuel Beckett's novel `_Watt_`, first published in 1953 but written much earlier, when Beckett was aiding the French Resistance during World War II.

The novel `_Megawatt_` leaves aside all of the more intelligible language of Beckett's novel and is based, instead, on that which is most systematic and inscrutable. It does not just recreate these passages, although with minor changes the `_Megawatt_` code can be used to do so. In the new novel, rather, they are intensified by generating, using the same methods that Beckett used, significantly more text than is found in the already excessive `_Watt_`.

To produce the novel in markdown format, run `megawatt.py` (a Python 2 program) with `TextBlob` (a text processing library) installed.

```
% python megawatt.py > megawatt.text
```

To produce PDF and epub documents, use `pandoc`:

```
% pandoc -V geometry:paperwidth=5.5in \
  -V geometry:paperheight=8.25in \
  -V geometry:margin=.7in -o megawatt.pdf \
  megawatt.text
% echo '% Megawatt' > info.txt
% echo '% Nick Montfort' >> info.txt
% pandoc -o megawatt.epub info.txt megawatt.text
```

`_Megawatt_` was written/generated for the second NaNoGenMo (National Novel Generation Month) in November 2014, and is free software. """
